

LIFT

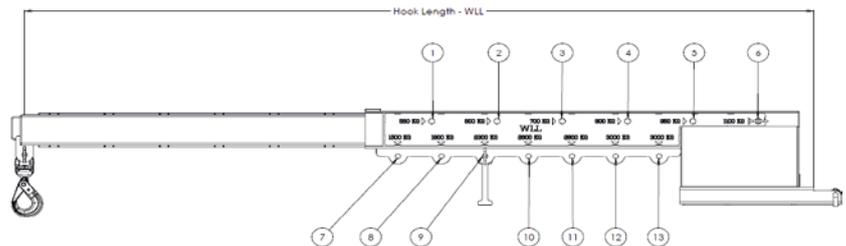

FORKLIFT JIB ATTACHMENT FIXED 3000KG

A fork mounted extending jib specifically designed to convert a forklift into a long reach mobile crane.

The Forklift Crane Arm allows considerable flexibility to reach and transport particularly long and awkward loads. It is available as a fixed (3000KG) or adjustable angle arm (5000KG). The adjustable arm is specifically useful for managing larger loads.

KEY FEATURES

- It reduces the need of a crane on site to transport loads that are too long and awkward for a forklift.
- Multiple hook locating positions for different size loads.
- Can be fitted quickly and easily to forklift forks.
- Complete with a removable crane arm leg for safe storage when not in use.

TECHNICAL TABLE	
Height	500mm
Width	685mm
Closed length	2350mm
Extended Length	3850mm
Weight	180kg
Working Load Limit	3000kg
Fork Pocket	198 x 78mm

DRAWING REFERENCE	LENGTH	WORKING LOAD LIMIT

LIFT

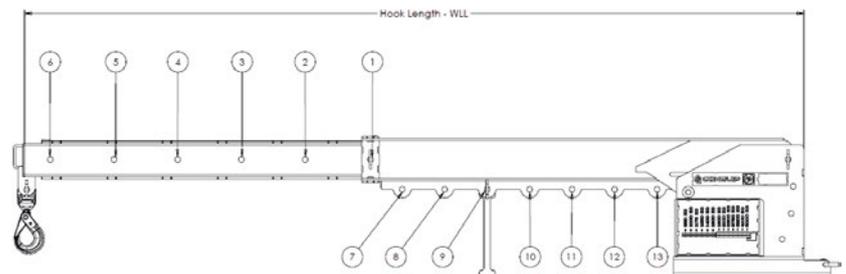

FORKLIFT JIB ATTACHMENT ADJUSTABLE 5000KG

A fork mounted extending jib specifically designed to convert a forklift into a long reach mobile crane.

The Forklift Crane Arm allows considerable flexibility to reach and transport particularly long and awkward loads. It is available as a fixed (3000KG) or adjustable angle arm (5000KG). The adjustable arm is specifically useful for managing larger loads.

KEY FEATURES

- The adjustable angle crane arm can be angled to manage awkward loads.
- It reduces the need of a crane on site to transport loads that are too long and awkward for a forklift.
- Multiple hook locating positions for different size loads.
- Can be fitted quickly and easily to forklift forks.
- Complete with a removable crane arm leg for safe storage when not in use.
