

# 10T SPREADER BEAM

Aluex is a state of the art lifting beam with endless opportunities. Lift boats, construction equipment and a lot more, both big and small pieces. The lifting beam may be set to three different length preferences and you don't need to worry about width, aluex sets that for you.

Our flagship lifting beam with a 10t lifting capacity and a weight of only 45kg has all features you would want a lifting beam to have. The Aluex is anything but heavy, forget everything that feels slow, heavy or hard to handle. Unloading and set up of the Aluex is faster than any other lifting beam on the market. While safety is most important, you still need to be fast.
