

LIFT

GGA 5000

- Counterweight balancer max. 5,000 kg
- Cable remote control
- Battery-powered

The counterweight balancer GGA 5000 is a load lifting attachment. It serves for lifting and positioning construction elements with integrated crane eye or for lifting and positioning construction elements in difficult to access areas (e.g. below eaves). Electrically driven counterweights allow balancing the load.

APPLICATION DATA

Counterweights	34 pieces removable (1 counterweight = 50 kg)
Operation	Cable remote control, radio remote control optional
Weight	approx. 900 kg (without counterweights) approx. 2.600 kg (with 34 pieces counterweights)
