

**LIFT**

# FLEXI-TROLLEY 700KG

This compact and collapsible glass trolley is narrow enough to fit through a standard doorway yet can easily handle loads of up to 700kg.

With a depth of just 450mm, this lightweight trolley can fit behind scaffolding and in between floor levels (depending on point loading).

Two vacuum cups securely hold glass up to 60mm thick in place and the fixing point of the cups are height adjustable between 500mm to 1830mm. Manufactured from lightweight steel, the Flexi-Trolley 700 is easy to build and disassemble for transportation.

## TECHNICAL TABLE
